## UNIVERSITY EXAMINATIONS 2023/2024

SECOND YEAR, THIRD SEMESTER EXAMINATION FOR BACHELOR OF SCIENCE IN  
NURSING  
SECOND YEAR, SECOND SEMESTER EXAMINATION FOR BACHELOR OF SCIENCE  
IN NURSING

### NND 3233/NNU 3223: GYNECOLOGICAL NURSING

**DATE: DECEMBER 2023**

**TIME:3 HOURS**

---

**INSTRUCTIONS:** Answer all questions in the booklet provided

Ensure that all your answers are properly numbered

Section One: Multiple Choice Questions (MCQs): Write the correct answer on the space provided in the answer booklet. Each MCQ is one mark.

Section Two: Short Answer Questions – Answer questions following each other on the answer booklet

Section Three: Long Answer Questions – Answer the questions on the answer booklet

All questions are compulsory

---

#### SECTION A: MULTIPLE CHOICE QUESTIONS

1. The following ligaments provide the most support to the uterus in terms of prolapse prevention
  - a) Broad ligaments
  - b) Utero-ovarian ligaments
  - c) Cardinal ligaments
  - d) Arcuate ligament

2. Which of the following is a risk factor in the development of uterine fibroids?
  - a) Nulliparity
  - b) Multiparity
  - c) Multiple sexual partners
  - d) Early menopause
3. Koki a 33-year-old lady presents with vulvar irritation and pruritus. Speculum examination was performed which reveals a hyperemic, edematous, vaginal vault with odourless discharge. The PH is 4.0, the most likely diagnosis is?
  - a) Trichomoniasis
  - b) Bacterial vaginosis
  - c) Candidiasis
  - d) Gonorrhoea
4. Genital warts in STI patient is caused by the following organism
  - a) Bacteria
  - b) Virus
  - c) Syphilis
  - d) Fungal
5. A common side effect of estrogenic hormone replacement therapy (HRT) in a 55-year-old woman is
  - a) Vaginal atrophy
  - b) Flushing
  - c) Coronary heart disease

- First-degree prolapse
  - Second-degree prolapse
  - Third-degree prolapse
  - Fourth-degree prolapse
18. May a para 6 aged 42-year-old obese woman on unopposed estrogen develops abnormal vaginal bleeding. Her Cervical Pap smear is normal. She is best evaluated by which of the following procedures?
- transvaginal sonography
  - endometrial biopsy
  - endometrial cytology
  - cervical biopsy
19. Health concerns in assisted reproductive technology includes?
- Psychological stress
  - Ectopic pregnancy
  - Multiple pregnancy
  - All the above
20. The mode of action (MOA) for the drug Clomiphene citrate used in the infertility is:
- Is an ovulation induction agent used as antiprogestosterone, resulting in a surge of gonadotrophin release by the pituitary
  - Stops the ovary from producing more follicles for maturation after the initial surge of leutenizing hormone
  - Binds to progesterone receptors in the pituitary and hypothalamusin to induce ovary ripening, by the follicle stimulating hormone
  - Binds to oestrogen receptors in the hypothalamus and pituitary resulting in a surge of gonadotrophin release for ovum maturation

## **SECTION B: SHORT ANSWER QUESTIONS 30 MARKS**

1. List any four (4) causes of abortions (2 Marks)
2. Distinguish between malignant and benign tumors (6 Marks)
3. Discuss the advice given on discharge to a patient after a vesicle vagina fistula (RVF) repair (6 marks)
4. Explain the TNM staging of cervical cancer (10 marks)
5. State 6 investigation performed on a couple who presents with infertility 2 for the male partner and 4 for the female partner (6Marks)

## **SECTION C: LONG ANSWER QUESTION: 20 MARKS**

A tearful M/S Poi aged 25 years is escorted to the Nchiru Level 4 hospital by a friend with complaints of having been forced to undergo FGM by the mother in law and the sisters in law. She further explains that the practice is accepted and celebrated by the community members.

- a) Formulate 4 Nursing diagnosis to be applied in the management of M/S Poi (4 Marks)
- b) Explain the specific management of M/S Poi for the first 24 hours (8 Marks)
- c) Explain any four (4) workable approaches a Community BSc. Nurse would adopt to reduce the FGM incidence in Nchiru Community (8 Marks)
